MONTHLY DIGEST OF STATISTICS

No. 276

DECEMBER 1968

1. This *Digest* has been prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments.

2. The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

3. The figures in the *Digest* are mainly totals for calendar months or monthly averages.

4. Some of the figures included in this *Digest* are provisional only and may be revised in later issues.

Definitions

5. A *Supplement of Definitions and Explanatory Notes*, published with the January issue, gives detailed definitions of all the terms and units used in the *Digest*.

6. The following general definitions should be noted in using the *Digest*:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Units of measurement.

Ton = long ton of 2,240 lb.

Gallon = imperial gallon.

Consumption and stocks. The terms 'consumption', 'disposals' and 'stocks' are normally defined in detail in the *Supplement* to the *Digest*. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

External trade. Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

Symbols and conventions used

7. *Symbols* The following symbols are used throughout:

.. not available.

— nil or less than half the final digit shown.

* average (or total) of five weeks.

8. *Change of basis.* A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

9. *Rounding of figures.* In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

(¹) Equals total final expenditure on goods and services at market prices less imports of goods and services less taxes on expenditure plus subsidies. Estimates of the gross domestic product at constant factor cost based on statistics of output are given in Table 3.

(²) Including an allowance for the difference in timing between the estimates of stock-building and the recording of exports.

(³) This represents taxes on expenditure less subsidies valued at 1958 rates.

(1) Figures of total working population, total in civil employment, employers and self-employed and total employees in employment, have been obtained by the method described on pages 207-214 of the May 1966 issue of the *Ministry of Labour Gazette*.

(2) The figures for June 1964 (a) and the corresponding figures for earlier months are not strictly comparable with those for June 1964 (b) and later months which are on the revised basis of calculation (see pages 110-112 of the March 1966 issue of the *Ministry of Labour Gazette*).

(3) Between June 1966 and June 1967 the industrial classifications of many establishments were corrected. The estimates for June 1967 take account of these reclassifications and the figures for individual industries are therefore not comparable with those published for previous mid-years. Two sets of estimates are given for June 1966 i.e. (a) excluding the effects of reclassifications (for comparison with earlier estimates) and (b) including the effects of reclassifications (for comparison with subsequent estimates). Please see the article on pages 206-215 of the March 1968 issue of the *Ministry of Labour Gazette*.

(4) Figures after June 1967 for industry groups and the totals for the index of production industries and manufacturing industries are provisional and may be revised after the count of National Insurance cards at mid-1968.

(5) Owing to reclassification, figures for 1963 are not strictly comparable with those from 1964 onwards. See page 59 of the February 1965 issue of the *Ministry of Labour Gazette*.

⁽¹⁾ Established and unestablished staff, excluding employees of the Northern Ireland Government. In arriving at the totals two part-time workers are counted as one whole-time worker.⁽²⁾ Casual or seasonal staff recruited for periods normally of less than six months. These are included in the total and other columns.⁽³⁾ From April 1965 the figures include Post Office grades previously classified as Industrial.⁽⁴⁾ In April 1963 certain staff were transferred from Defence Departments to the Ministry of Public Building and Works.⁽⁵⁾ Ministry of Social Security before November 1968.⁽⁶⁾ Ministry of Labour up to 14 May 1968.⁽⁷⁾ Ministry of Aviation up to January 1967. In February 1967 the functions of the Ministry of Aviation were taken over mainly by the Ministry of Technology (which was formed in October 1964).⁽⁸⁾ In July 1966 certain staff of the Ministry of Aviation were transferred to the Board of Trade.⁽⁹⁾ Including the Ministry of Technology up to January 1967.

Note: Between June 1966 and June 1967, the industrial classifications of many establishments were corrected. The estimates from January 1967 onwards have been revised to take account of these changes in industrial classification and also to take account of information obtained from the June 1967 count of National Insurance cards.

(1) Figures relate to establishments with more than 10 employees in all manufacturing industries except shipbuilding and ship repairing.

(2) Excluding maintenance staff.

(¹) Stoppages involving fewer than 10 workpeople or lasting less than one day have been omitted except in which the total-number of working days lost exceeded 100. The figures for 1968 are provisional.

(²) The analysis by industries is based on the revised *Standard Industrial Classification 1958*.

(³) Where stoppages extend over more than one month, the workers involved are counted in the month in which they first participated.

(⁴) The figures of working days lost relate to the total working days lost within each of the periods shown as a result of stoppages *in progress* in that period, whether the stoppages began in that period or earlier.

⁽¹⁾ Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each month.
⁽²⁾ Including prescribed industrial disease. ⁽³⁾ Yearly figures are averages of twelve monthly figures. Monthly figures up to January 1966 relate to the third Tuesday of the month; later figures relate to the first Tuesday and are estimated by a new method following changes in the medical certification arrangements. ⁽⁴⁾ These figures include substantial numbers of persons who have been sick for a long time and who may no longer be in employment. ⁽⁵⁾ Yearly figures are averages of quarterly figures. Quarterly figures relate to first Monday in February, May and November and last Monday in July. ⁽⁶⁾ Including a diminishing number of widows with pensions of 30s. a week derived from the old Contributory Pensions Acts. About 77,000 such pensions were being paid in June 1966. ⁽⁷⁾ Before 5 August 1957 widow's pension was converted to retirement pension at age 60; since that date widow's pension continues to age 65 or date of retirement if earlier. ⁽⁸⁾ The yearly figures relate to the end of January in the following year up to 1963, and to the end of December from 1964. ⁽⁹⁾ Including the elder or eldest child for whom no allowance is payable. ⁽¹⁰⁾ Average of twelve months March 1966 to February 1967. Average of five weeks.

(⁸) Production figures relate to hay only. The production of hay in England and Wales is calculated from the area cut for hay and actually harvested and does not include the area mown for silage, drying or seed; the production of hay in Scotland and Northern Ireland is calculated from the area cut for hay only and does not include grass mown for silage or drying. (⁹) Clover and rotation grasses. (¹⁰) Figures no longer available. (¹¹) Includes Lucerne (45,000 acres). (¹²) Includes hay from permanent grass in Scotland. (¹³) Excludes some 47,000 holdings in England and Wales which make a negligible contribution to agricultural output. This affects comparison with permanent grassland acreage figures in previous years. (¹⁴) Includes the total area of deer forest land in Scotland.

⁽¹⁾ This index provides a general measure of monthly changes in total industrial production. The unadjusted index allows for variations in the length of calendar months so that it gives the average weekly rate of production in each month. The seasonally adjusted index allows for holidays and regularly recurring seasonal movements.

As some of the figures on which the index is based are available only with considerable delay, the index numbers for the last few months are always liable to be revised. Industries are grouped according to the *Standard Industrial Classification, 1958*.

(1) Mines operated by the National Coal Board which account for about 99 per cent of the total output. Changes in the basis of the recorded figures have occurred from time to time making comparisons difficult. The figures given in this table have therefore been adjusted where necessary to conform throughout to the current definitions given in the *Supplement of Definitions and Explanatory Notes*.

(2) From April 1966, attendances at training and other non-operational activities are excluded.

(1) From 1964 onwards parts are included. (2) Excluding those for aircraft, road vehicles, wheeled and half-track tractors (other than heavy earth-moving types), fighting vehicles and heavy slow-speed engines for ship propulsion. (3) The estimated breakdown between home and export deliveries and net new orders has been revised to make the figures comparable with 1967 (when more complete information on this breakdown started to be collected). The estimates for earlier years are believed to be reasonable. (4) Between December 1964 and January 1965 there is a small increase (under 5 per cent) due to the inclusion of additional firms. (¹) Wool, hosiery (and other knitted goods), made-up clothing and the spinning, weaving and merchant converting sections of the cotton and man-made fibre industries. (²) The index numbers for individual sectors relate to the total output of manufacturers whose main business is in that sector of the industry and not output of that particular type of garment. (³) These indices have been adjusted to allow for the differences in the lengths of calendar months but not for holidays or for other seasonal variations. (⁴) From January 1965 the figures relate to an enlarged panel of contributors.

⁽¹⁾ The figures for new orders were collected on a new basis in 1964 and adjustments have been made to some of the figures to make the series continuous and bring them into line with output figures.

⁽²⁾ These figures relate to work included in the preceding columns which is to be done without a firm order.

⁽³⁾ Including garages and shops.

⁽⁴⁾ Including gas, electricity, coal-mining, railways and air transport.

(¹) The figures relate to schemes mainly over 5,000 sq. ft. (²) For all projects (new buildings, extensions to existing premises and buildings converted to industrial use) for which industrial development certificates were issued. (³) The area of industrial building has, since mid-August 1966, been extended to include all ancillary space for storage, canteens, etc. Prior to that date ancillary space was not counted, except in Scotland, Wales and the Northern region; the figures since that date on the old basis of measurement are estimates of the area which would have been approved under the pre-August 1966 definition. (⁴) For manufacturing industry only (new buildings and extensions to existing premises). (⁵) Provisional.

(¹) Excluding building which is wholly financed from private sources. (²) From January 1960 for Scotland and from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. The value of such projects, shown separately for the years 1946 to 1959 in previous tables of educational building, has been included as appropriate under the headings 'Primary and secondary' and 'Special schools'. (³) Figures for England and Wales include the value of projects for which specific approval is not required. (⁴) Totals for England and Wales include the value of certain projects for which no analysis between type of project is available. As from October 1961, the individual value of such projects is less than £2,000. (⁵) Figures for England and Wales relate to project values and those for Scotland to contract values. Figures for Scotland include the cost of certain minor projects for which specific approval is not required. (⁶) The Scottish figures of projects approved refer to approval at the sketch plan stage, which might be some six to twelve months before the start of construction. (⁷) The Scottish figures of 'Under construction' and 'Completions' are based on the tender costs. The 'Under construction' and 'Completions' figures exclude the value of approved school projects which in 1967 amounted to £1,497,000 and £59,000 respectively.

⁽¹⁾ The method of calculation of the number of new places provided differs in England and Wales and Scotland. In England and Wales the figures refer to the number of pupils for which new school accommodation is designed. In Scotland the figures refer to the sum of the approved capacities of all the teaching rooms whether classrooms or practical rooms, and will normally exceed the number of pupils for which accommodation is designed.

⁽²⁾ Including new schools brought into partial use before completion.

⁽³⁾ Extensions, alterations, remodelling and war damage repairs.

⁽²⁾ The reduced fares category includes statutory day returns in the London area. From 29 January 1966 full fares and reduced fares have been combined for London Transport railways. Similarly, the annual figure for 1965 has been combined, with an appropriate revision for 1964.

⁽³⁾ Season ticket journeys are calculated on the basis of 600 journeys per annum for London Transport, and 540 journeys per annum for British Railways.

⁽²⁾ Up to and including 1962 the figures are based on miles actually hauled and include free-hauled traffic except that hauled by departmental trains. From the beginning of 1963 they are based on miles charged for and exclude all free-hauled traffic.

^(*) In addition to its lending, the National Loans Fund meets the interest and management charges of the national debt. To the extent that these charges are not matched by interest received on its own lending and by profits of the Issue Department of the Bank of England, the Consolidated Fund meets the difference. The surplus on the Consolidated Fund is paid to the Fund, leaving the differences between that and its net lending as the Fund's financing requirement.

The sum of the twelve monthly receipts under certain headings is slightly greater than the total for the financial year. This is because the monthly figures include duties ultimately payable to the Isle of Man and adjustments for these are made only at the end of the financial year. ⁽⁵⁾ Including receipts from the 10 per cent regulator on most Customs and Excise duties and on purchase tax, operative (i) from 26 July 1961 to 9 April 1962 and (ii) from 21 July 1966 to 11 April 1967 and (iii) from 23rd November 1968. ⁽⁷⁾ Including receipts from the temporary charge on imports from October 1964 to November 1966 less export rebates. ⁽⁸⁾ Including £2.7 millions import deposits from 27 November 1968.

(¹) Total deposits less (i) balances with, and cheques in course of collection on, other banks in the United Kingdom and the Republic of Ireland and (ii) items in transit between offices of the same bank.

(²) Comprising (i) Coin, notes and balances with Bank of England, etc. (excluding special deposits); (ii) Money at call and short notice; (iii) Bills discounted, which include re-financeable export credits.

(³) Excluding items in transit.

(⁴) Figures supplied by the Bank of England and rounded to the nearest £5 million.

(⁵) Excluding advances to nationalised industries (including, from 28 July 1967, the British Steel Corporation).

(⁶) After 31 March 1966 the figures exclude the Irish business of the National Bank transferred to the new National Bank of Ireland.

(⁷) The figures are affected by the exclusion of advances to the nationalised steel companies (see footnote (⁵)).

(⁸) The sharp fall between May and June and sharp rise between June and July probably reflect distortion in the seasonal pattern over the half-year.

(1) Although some headings in the new classification are the same as those in the analysis published previously by the British Bankers' Association (last published in February 1968 issue) the contents of most of these headings are by no means identical. This is mainly due to differences of coverage which result from basing the new analysis on the *Standard Industrial Classification*.

(2) The annual figures are averages of the figures for February, May, August and November.

⁽²⁾ The February 1968 figures are affected by the revaluation of foreign currency advances after 18 November 1967, and by the inclusion of several new contributors. Together, these accounted for some £260 million of the increase over the quarter in total advances (U.K. residents+£60 million and overseas residents+£200 million).⁽³⁾ Other banks includes accepting houses, overseas banks and other domestic banks.⁽⁴⁾ Chemicals and allied industries included in Other manufacturing.

⁽¹⁾ Derived from yield-maturity curves fitted by computer; an outline of the method used was given in the *Bank of England Quarterly Bulletin* for March 1967. Taxes are ignored. The yearly figures are averages of end month yields. The monthly figures for 1964-66 relate to the last working day and from January 1967 to averages of Wednesdays.

⁽²⁾ From 1961 to 1962 stocks with coupons below 3½ per cent were omitted from the calculation of the curves; from January 1963 the limit was 4 per cent and from January 1966 5 per cent. The effect of the break between 1962 and 1963 on the annual averages is negligible; the break in January 1966 causes a drop of 0.06 per cent in the short-dated series but does not affect the medium- or long-dated series.

⁽³⁾ Average of working days, based on the mean of the middle opening and middle closing prices each day, excluding gross accrued interest; tax is ignored.

⁽⁴⁾ Averages of daily figures calculated from middle market closing prices.

⁽⁵⁾ Gross redemption yields of 15 stocks so combined as to give a yield average for a constant 20-year term.

(1) This index is compiled from the results of a monthly enquiry into total wage and salary earnings. The index has been revised and a full description is given in the *Ministry of Labour Gazette* for March 1967.

(2) The industries included in the enquiry are manufacturing, agriculture, mining, construction, gas, electricity, water, transport and communication and certain miscellaneous services. The coverage of the returns is virtually complete in gas, electricity, coalmining and rail transport. In the remaining sectors, the index is based on returns from a sample of about 7,500 firms having about 5½ million employees. In all, the returns show the earnings of about 60 per cent of the total number of employees in the industries concerned.

(²) England and Wales only. (⁴) Except sea transport and postal services. The indices from October 1966 include British Road Services. (⁵) Consisting of laundries and dry cleaning, motor repairers and garages and the repair of boots and shoes. (⁶) The epidemic of foot and mouth disease prevented visits by Ministry of Agriculture Wages Inspectors to farms in infected and adjacent areas. For this reason there is insufficient information to enable an accurate index for Agriculture to be calculated for this month but the best possible estimate has been used in the compilation of the index for all Industries and Services. (⁷) Provisional.

Note: There are fluctuations from month to month due to such factors as bonus payments, seasonal variations in hours worked, loss of overtime pay during holidays, etc. Seasonally adjusted figures for all industries covered are given in the second column of the table. Although the seasonally adjusted figures have been revised and are now based on five years data they cannot be regarded as precise. It is not yet possible to produce reliable seasonal adjustments for the individual industries.

⁽¹⁾ The figures are based upon changes in basic rates of wages or minimum entitlements and reductions in normal weekly hours, which are normally determined by national collective agreements or statutory wages regulation orders. The figures relate to the end of the month. A brief note on the method of compilation of the figures is given in the current issue of the *Employment and Productivity Gazette*.

⁽²⁾ In general, males under 21 and females under 18 years of age.

⁽³⁾ The term 'Manufacturing industries' covers all industries included in Orders III-XVI of the revised *Standard Industrial Classification, 1958*.

(¹) The figures relate to changes in basic full-time weekly rates of wages or minimum entitlements and do not reflect reductions in normal weekly hours without loss of pay or variations in actual earnings arising from such factors as overtime or lost time. The changes included are those determined by national collective agreements or by statutory wages councils or boards.

(²) The monthly totals in the columns headed 'Increase' and 'Decrease' relate to the number of workpeople affected by changes and the corresponding gross amounts. Workpeople affected by two or more changes are counted only once in the annual totals which relate to the number having increases only or for whom increases exceeded decreases, the number having decreases only or for whom decreases exceeded increases, and the corresponding net amounts; the column headed 'Net increase,' is therefore the overall net increase for the year.

(³) The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the workpeople covered by the statistics, for a full ordinary week's work at basic rates of wages at the end of any one year exceeds that for the corresponding week of the preceding year by the amount stated. The average weekly wages paid during any one year will not, however, exceed those paid during the preceding year by this sum, as the actual changes will have taken place at various dates during the year.

(¹) The index of retail prices replaced the Interim index from January 1956. A new set of weights was introduced, based on ascertained consumption in 1953-54, valued at January 1956 prices. Commencing in January 1962, the weights have been revised each January on the basis of ascertained consumption in the three years ended in the previous June, valued at prices obtaining at the date of revision.

(²) The Cost of Living Advisory Committee recommended in 1962 that until a satisfactory index series based on actual prices became available half the expenditure on meals out should continue to be allocated to the food group and the other half spread proportionately over all groups, including the food group. The index for meals out for 16 January 1968 implicit in this recommendation was 121.4.

(³) Since January 1968 an index series based on actual prices has been available and indices in this series have been linked with the implicit index for meals out for 16 January 1968, to obtain indices for meals out with 16 January 1962 taken as 100.

These are the weights which would have been used in 1968 if expenditure on meals out had been treated as in previous years (see footnote⁽²⁾). The weights actually used are given in the following line.

(1) Based on manufacturers' list prices.

(2) The market-price series are based on prices before the addition of subsidies paid to producers under the Cereals Deficiency Payments Scheme and Fatstock Guarantee Scheme.

(3) The gross-price series for wheat, cattle and pigs are based on prices after the addition of subsidies paid to producers; those for milk and eggs on prices paid to producers by the marketing boards for these commodities; and that for potatoes on producer prices, sometimes 'supported' by the Potato Marketing Board.

(4) Figures to June 1967 have been adjusted to final deficiency payments.

(5) Maincrop potatoes only.

(6) Based on guaranteed minimum prices to producers at packing station until March 1966, then on B.E.M.B. prices to producers under the Egg Contract Schemes.

(7) Based on net prices to farmers after deduction of subsidy.

⁽¹⁾ Great Britain. Figures until June 1959 were based on quarterly returns from virtually all cinemas. From July 1959 onwards, figures were estimates based on information relating to a sample of cinemas. From April 1967, figures are based on four-weekly returns submitted regularly to H. M. Customs and Excise by cinemas responsible for approximately 94 per cent of total takings with an estimate for the remainder of the cinemas, which are exempt from four-weekly returns. This estimate is based on an annual Board of Trade inquiry.

⁽²⁾ Manufacturers' sales exclusive of purchase tax.

⁽³⁾ Including medium play and a small number of other types.

*Average of five weeks.

ANNUAL ABSTRACT OF STATISTICS 1968

The ANNUAL ABSTRACT OF STATISTICS contains a selection of the most important statistics covering the economic, industrial and social life of the United Kingdom. The latest edition, gives annual figures so far as they are available for the years 1957 to 1967, and in some tables also the early months of 1968. The Abstract contains over 380 tables covering the following subjects:

| | | |
|----------------------|----------------------------|--------------------|
| Agriculture and food | Fisheries | Passenger movement |
| Balance of payments | Fuel and power | Population |
| Banking | Housing | Prices |
| Construction | Industrial production | Retail trade |
| Climate | Insurance | Transport: |
| Crime | Labour | Road, rail and air |
| Education | Materials and manufactures | Shipping |
| External trade | Migration | Social services |
| Finance: | National health service | Vital statistics |
| Home and overseas | National income | Wages and earnings |

Standard Regions and Conurbations are defined in Appendix I.

Appendix II gives the 152 Minimum List Headings grouped into the 24 Orders of the Standard Industrial Classification (1958).

The Abstract also contains a useful current Index of Sources which lists the titles of official publications or other sources containing statistics allied to those in the tables.

The Abstract is of special and immediate value to industrialists, journalists and economists, besides being of great interest to the general public. In many cases the annual figures are presented in greater detail than in the MONTHLY DIGEST OF STATISTICS.
